PROFILE SUMMARY

Experienced Web Developer and Server Administrator with a strong background in WordPress development, front-end technologies, and cloud server management. Skilled in building, optimizing, and maintaining high-performance websites with a focus on speed, security, and SEO best practices. Adept at managing VPS and cloud environments, domain and DNS configurations, and deploying web and mobile applications. Passionate about continuous learning and delivering scalable, reliable digital solutions.

WORK EXPERIENCE

AIT Systems   2022 - PRESENT

Front-End Engineer, UI/UX Designer & Cloud Infrastructure Specialist

- Developed, customized, and maintained high-performance WordPress websites for business and enterprise clients
- Built responsive front-end interfaces using HTML5, CSS3, JavaScript, following modern UI/UX and accessibility standards
- Designed user-centered UI/UX layouts, wireframes, and page structures to enhance usability and conversion rates
- Created social media designs and digital assets aligned with branding and marketing strategies
- Optimized websites for speed, performance, and Core Web Vitals, improving SEO and user experience
- Implemented technical SEO and on-page SEO best practices, including keyword research and content optimization
- Managed VPS and cloud server environments, handling deployment, scaling, monitoring, and maintenance
- Administered Linux servers, configuring Apache & Nginx, PHP environments, and hosting stacks
- Set up and managed email servers, domain services, DNS configurations, and SSL certificates
- Supported mobile application deployment and assisted in backend integration and hosting configuration
- Coordinated tasks and timelines, contributing to project management and smooth delivery of web and mobile projects
- Executed and supported digital advertising and media buying campaigns, ensuring technical readiness and tracking performance
